

Food contact Compliance Statement (FDA)

Date: November 12, 2024ⁱ

Product: **SE-F Series silicone inks**

We hereby provide the following information based on the compliance status of materials used at present by Boston Industrial Solutions, Inc. for the manufacture of the SE-F Series silicone inks, as set out in the regulations that apply in the United States of America (FDA) for printing inks, materials, and articles intended to come into contact with food items:

- Natron® SE-F Series silicone inks comply with the requirements of the FDA regulations (CFR) Title 21, Parts 170–199 regulates food contact substances and materials in the United States, as well as with those of other applicable FDA regulations. SE-F Series may be used for the printing, marking, or labeling of articles or components of articles intended for food-contact use.

Natron® is a registered trademark of **Boston Industrial Solutions, Inc.**

NOTE:

The information provided by Boston Industrial Solutions, Inc., in this or other communications, or on its website, concerning the substance content of its products represents Boston Industrial Solutions, Inc., knowledge, and belief as of the date that it is provided. Boston Industrial Solutions, Inc., bases its knowledge and information provided by its raw materials suppliers, and third-party testing and makes no representation or warranty as to the accuracy of such information. However, Boston Industrial Solutions, Inc. makes no guarantees as to the suitability of its materials for any given application, and thus assumes no obligation or liability whatsoever in connection with the information provided above. In no event shall Boston Industrial Solutions, Inc.'s liability arising out of such information exceed the total purchase price of the Boston Industrial Solutions, Inc., product at issue.

It remains the customer's sole responsibility to assess the final suitability of the chosen Boston Industrial Solutions, Inc. product for the intended food contact application, i.e. checking if the physical properties of the silicone material make it suitable for the intended application, checking compliance of the finished silicone article with the relevant extraction limits, checking possible influence of the silicone material on color, odor or taste of the contacting foodstuffs, etc.

All statements, technical information, recommendations, and advice are for informational purposes only and are not intended and should not be construed as a warranty of any type or term of sale. The reader, however, is cautioned that Boston Industrial Solutions, Inc. does not guarantee the accuracy or completeness of this information, and it is the customer's responsibility to test and assess the suitability of the products of Boston Industrial Solutions, Inc. in any given application or for use in a finished device.

ⁱ This statement expires in case of regulatory or compositional changes. New statements are published on our website in case of alterations; previous statements then automatically become void. Please always consult our website for the latest version.
